Note 1: Customized design is available, please contact us.

Note 2: All test referenced to 26°C ambient.

Note 3: Inductance tolerance +/- 20%.

Note 4: Inductance is measured with Agilent® LCR meter 4285A (or equivalent) at 1MHz/1V.

Note 5: DC resistance is measured with HIOKI® micro-ohm meter RM3542 or equivalent.

Note 6: Isat means that DC current will cause a 30% inductance reduction from initial value.

Note 7: Irms means that DC current will cause an approximate  $\Delta T$  of 40°C.

Do not exceed to bend the board after soldering this product extremely.  
(reference examples)

- Mounting place must be as far as possible from the position, which is close to the break line of board, or on the line of large holes of board.
- Do not bend extremely the board, in mounting another components.  
If necessary, use back-up pin (support pin) to prevent from bending extremely.
- Do not break the board by hand. We recommend to use the machine or the jig to break it.
