Amphenol ANYTEK

As one of the member company of Amphenol Group, Anytek concentrates on terminal blocks designing and production over 20 years, our research and development ability will always provide customers with new designs, reasonable prices and efficient services to meet their various demands.

Taipei Head Quarter - since 1997

Based on leading production technology, especially for automatic assembly, our high quality products bring best solution to different customers, and widely used in Electric Power, Industrial Control, Security and Protection, Lighting, Elevator, Info-communication and so on. All of our products meet UL, CSA or VDE regulations, and also EU Directive RoHS compliant.

Anytek set up sales network all over the world, Asia, Europe, America etc., worldwide customers also grant us quick knowledge on their new requirement and market development trend, which also is the important engine for Anytek to innovate insistently, and grow up with customers simultaneously.

Overvoltage category

- Overvoltage I**
Equipment for connection to circuits in which measures are taken to limit transient overvoltages to and appropriately low level
適用在低電壓及低瞬間電流之設備。
- Overvoltage II**
Energy-consuming equipment to be supplied from the fixed installation
適用在一般固定式能源設備。
- Overvoltage III**
Equipment in fixed installations and for cases where the reliability and the availability of the equipment is subject to special requirement
適用在特殊用途之固定式設備。
- Overvoltage IV**
Equipment for use at the origin of the installation
應用在電力系統上。

Pollution degree

- Pollution degree 1**
No pollution or only dry, non-conductive pollution occurs. The pollution has no influence.
無污染或是乾燥、無導性等場所。如無塵室。
- Pollution degree 2**
Only non-conductive pollution occurs that occasionally a temporary conductivity caused by condensation is to be expected.
只有無導性污染,或是偶爾因凝結物(例如灰塵)產生之短暫導電性污染處。如辦公室、居家場所。
- Pollution degree 3**
Conductive pollution occurs or dry non-conductive pollution occurs which becomes conductive due to condensation which is to be expected.
因凝結物(例如灰塵)所造成之導電性污染或是乾燥之無導電性污染等污染處。如工廠或是室內公共場所。
- Pollution degree 4**
Continuous conductivity occurs due to conductive dust, rain or other wet conditions.
由於灰塵、雨水或是其他戶外潮濕環境等引起的持續可導電性污染處。如戶外公共場所。

1) This voltage is

- a) For function insulation: the operating voltage.
- b) For base insulation and additional insulation of a circuit fed directly by the low voltage selected from table 3a or 3b on the basis of the rated voltage of the items or the rated insulation voltage;
- c) For base and additional insulation of systems, items and internal circuits which are not fed directly by the mains: the highest true r.m.s. Value of the voltage that, within the bounds of the rated data, can occur in the system, the items or the internal circuit, when supplied with rated voltage and in the case of an unfavorable combination of operating conditions.

2) In the case of pollution degree 3, insulation material group IIIb is not recommended for use if voltages are greater than 630V.

Column I applies to screws without heads if the screw, when tightened, does not protrude from the screw hole and to other screws which cannot be tightened by means of a screwdriver with a blade wider than the diameter of the screw.

Column II applies to nuts of mantle clamping units which are tightened by means of a screwdriver.

Column III applies to other screws which are tightened by means of a screwdriver.

Column IV applies to screws and nuts, other than nuts of mantle clamping units, which are tightened by means other than a screwdriver.

Column V applies to nuts of mantle clamping units which can be tightened by means other than that of a screwdriver.

Where a screw has a hexagonal head with a slot and the values in column III and IV are different, the test is made twice, first on a set of three specimens, applying to the hexagonal head the torque specified in column IV, and then to another set of three specimens, applying the torque specified in column III by means of a screwdriver. If the values in columns III and IV are the same, only the test with the screwdriver shall be made.
